

PRODRAW 365

GENERAL DESCRIPTION

Prodraw 365 is a versatile, concentrated liquid drawing and stamping compound designed for use in medium to heavy duty applications. Prodraw 365 utilizes a new technology in synthetic lubrication to give good results in difficult applications. Prodraw 365 is formulated to be chlorine-free.

The high lubricity lowers frictional heat, and improves die life. Parts formed with Prodraw 365 are frequently cooler after drawing than they are when drawn with other oil or synthetic lubricants. The film left on the part after drawing will not interfere with welding operations as will oil base lubricants. Prodraw 365 is used in many automotive applications. Prodraw 365 passes ASTM D1735 humidity corrosion testing. This product can be applied by brush, drip, roller, spray or flood. A dilution of 3-4:1 is frequently used for deep draws on 3/16" steel.

TYPICAL PROPERTIES

Appearance.....	Light green solution
Odor	Slight
Weight, lbs./gal.	8.9
Chlorine.....	None
pH, concentrate	8.7

SHIPPING CONTAINERS

Available in 5 gallon pails, 55 gallon drums or 275 gallon bulk containers.

HEALTH & SAFETY

Material Safety Data Sheets are available for all Wallover products. Consult the MSDS for information regarding the storage, handling and disposal of this product.

WARRANTY

All reasonable effort has been made to ensure that the information provided in this publication is accurate. No warranties are expressed or implied since the use of this product is beyond our control.
