

Wallover Product:

## WS8065 and Various Maintenance Lubes

Application:

**Machining Large Bolts**

Time Period:

One Month

Summary:

Concentration was very high. Customer reported usage was out of control and customer would run out of inventory multiple times a year.

Results:

Coolant usage was cut from two drums per month to one drum per month. The Wallover program reduced required inventory on the customer's floor without the concern about running out of maintenance lubricants or coolants.

**Conclusion:**

**The Wallover Advantage resulted in a happy customer who cut costs and improved quality.**
